# A Sustainable and Highly Effective Bionematicide for Potatoes

## THE NEW STANDARD FOR SUSTAINABLE AND EFFECTIVE HAS ARRIVED

Make Majestene™ the highly effective and sustainable nematicide in your IPM program. Majestene has a novel bacteria-based (non-living) active ingredient that possesses true nematocidal activity against eggs, juveniles and adult nematodes.

### MODE OF ACTION

- Bacteria-based active ingredient that kills nematodes
- Posited multi-site mode of action against eggs and juveniles
- Activity by contact, ingestion and exposure
- Internal plant response
- Broad spectrum activity against many nematode species that also affects certain soil arthropods

### QUALITY AND FLEXIBILITY

- 0-Day PHI & 4 hour REI
- In-Season Applications
- Not harmful to workers
- NOP Compliant and OMRI-Listed
- Tolerance Exempt
- Ground and chemigation applications
- Liquid formulation
- No limit to the number of applications per season
- Product does not need to be refrigerated
- 3 year shelf-life

### KEY NEMATODES

- Root Knot
- Lesion
- Other Species Under Evaluation

### BEST PRACTICES

- Apply 2 gal/acre
- Begin applications 3 days prior to or at planting and continue on a 3 week interval for season-long control.
- Do not exceed spray concentrations of 1% v/v.
- Deliver solution at the end of an irrigation event.

### SPRAY TIMING

PEST	Planting	10-12 Inch Potatoes	Row Closure	Row Closure-Harvest apply on a 3-week interval
Root Knot				
Lesion
