REGALIA®
BIOFUNGICIDE

AN EFFECTIVE, ENVIRONMENTALLY RESPONSIBLE BIOFUNGICIDE FOR BETTER CROP PROTECTION AND BETTER CROP PERFORMANCE.

Sustainable addition to a spray program improving resistance management and reducing the overall environmental footprint.

Disease prevention and plant health to provide consistently strong yield.

Simplified exportation: No chemical residues or testing required.

Synergistic tank mix partner with strobilurins and triazoles to enhance performance.

Not harmful to workers, food, beneficials and pollinators.

ACTIVATE YOUR ALMOND’S DEFENSE SHIELD

From start to finish, season after season, you need trees that deliver peak performance. To optimize your almond program, get the benefit of protection with Regalia®. Featuring a complex and unique mode of action, Regalia is the only product within the FRAC P5 classification. Regalia enhances a plant’s ability to defend itself against diseases impacting quality and yield. Foliage treated with Regalia has also been shown to have increased amounts of chlorophyll for optimal plant health and growth.

MAXIMUM OPERATIONAL FLEXIBILITY

- MRL Exempt
- 0-Day PHI
- 4-Hour REI
- Rainfast in 1 hour
- NOP Compliant and OMRI listed

KEY LABELED DISEASES

- Monilinia/Blossom Blight/Brown Rot
  (suppression)
- Shot Hole
  (suppression)

PROTOCOLS

In a tank mix program:

- 1 quart of Regalia — 10 to 14 day intervals

In a rotational program:

- 2 quarts of Regalia, alternating with another fungicide — 7 to 10 day intervals

Apply Regalia preventatively, as a part of your program, before disease gains a foothold. At a minimum, it is recommended to use Regalia early for disease prevention and overall plant health, and late residue management.

To avoid petal staining or burn do not exceed 2 quarts per acre during bloom. Please see the product label for more information.
