

Downy Mildew Control USING BIO WITH BITE.™

Stargus™ Biofungicide, Bio-Conqueror of Downy Mildew

An advanced biofungicide offering growers a sustainable mode of action to control Downy Mildew and a broad range of other fungal and bacterial diseases in a large number of commercial specialty crops.

EFFECTIVE AGAINST:

- ✓ Downy Mildew
- ✓ White Mold
- ✓ Fusarium
- ✓ Botrytis
- ✓ Gray Mold
- ✓ And many more...

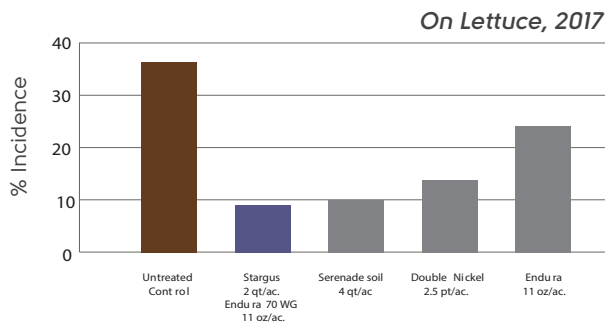

CAN BE USED IN ORGANIC PRODUCTION

STARGUS IMPROVES PLANT VIGOR AND OVERALL HEALTH

- Control Downy Mildew to increased marketable yield for top profit on every acre
- Simple IPM option gives peace of mind of sustainable disease management and resistance prevention
- Increases potential value of crop with no residue to worry about at harvest by being MRL-exempt
- Application flexibility with foliar, aerial, chemigation, and soil applied

In Trials

Stargus Biofungicide outperformed UTC & performed similarly to most standard materials against *S. sclerotiorum*.

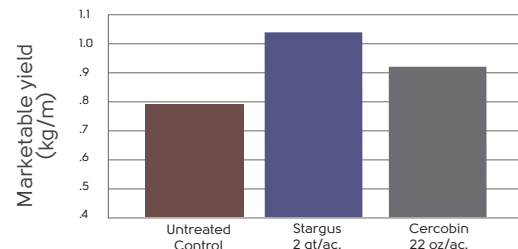

Stargus outperformed Endura® applied alone. Stargus rotation performed comparably to Endura rotation.

Cucumber Yield, 43% more with Stargus

Control of Downy Mildew on Cucumber. Stargus alone increased the yield significantly.

Snap Beans Yield

Stargus Biofungicide is very effective against White Mold

STARGUS HIGHLIGHTS

- Flexible application

- Potential increase in crop value
- Sustainable disease management
- Advanced biofungicide
- Increase marketable yield

CAN BE USED IN ORGANIC PRODUCTION

BASIC USE INSTRUCTIONS

Downy Mildew 2-4 quarts/acre (foliar)
White mold 2-4 quarts/acre (foliar)
Fusarium 3-4 quarts/acre (soil)

ALWAYS READ AND FOLLOW LABEL INSTRUCTIONS

Sustainable & Effective Integrated Pest Management that increases your return on investment.

At Marrone Bio Innovations (MBI), we create products from microorganisms isolated from samples collected from unique niches and habitats such as flowers, insects, soil and composts. Our proprietary technology enables us to isolate and screen naturally occurring microorganisms and plant extracts in a highly efficient manner and to identify those that may have novel, effective and safe pest management or plant health promoting characteristics.

If you haven't tried one of our products, we want to talk to you!
